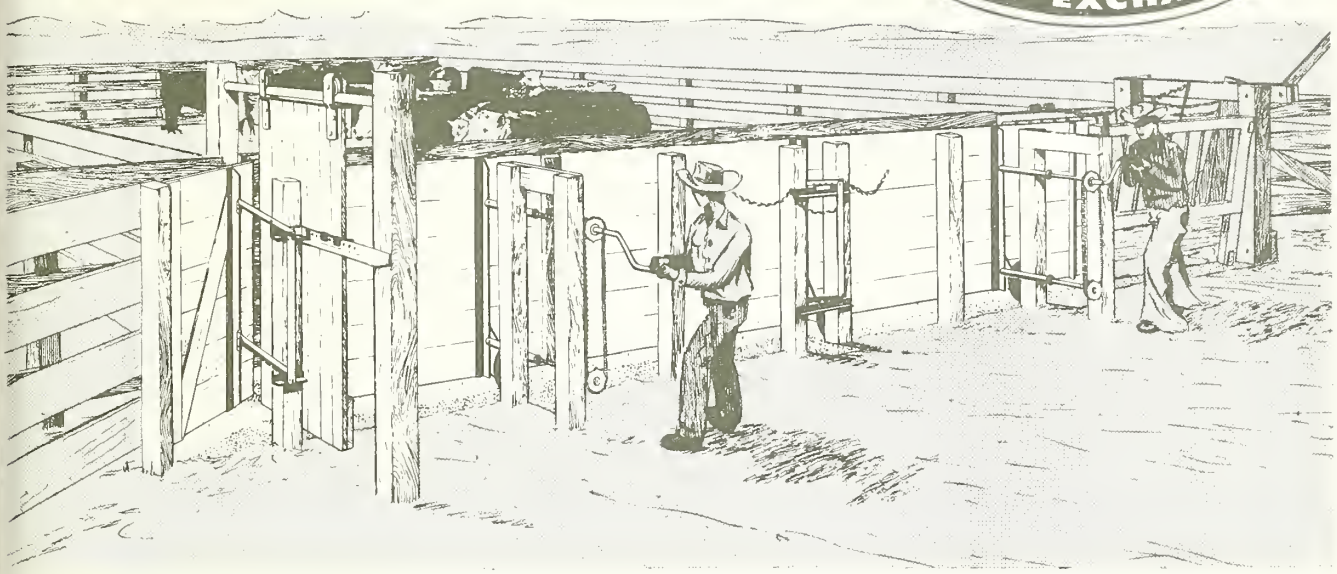
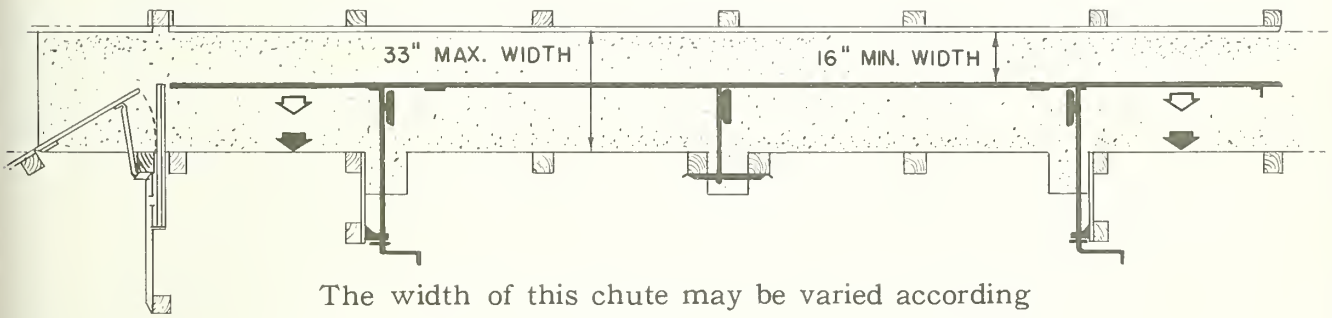
VARIABLE WIDTH CHUTE ... for cattle

COOPERATIVE FARM BUILDING
PLAN NO. 5850
(2 SHEETS)
PLAN EXCHANGE





The width of this chute may be varied according to cattle size by turning the two pairs of adjusting screws attached to the movable side. A hinged panel permits adjusting the throat width of the crowding chute to reduce bruising.

Length is 28 feet. Construction is of stock sizes of lumber, pressure treated with pentachlorophenol.

Complete working drawings may be obtained through your county agent or from the Extension agricultural engineer at most State agricultural colleges. There is usually a small charge.

ORDER PLAN NO. 5850, VARIABLE WIDTH CHUTE FOR CATTLE

If working drawings of this plan are not available in your State, write to the U.S. Department of Agriculture, Agricultural Engineering Research Division, Plant Industry Station, Beltsville, Md. The U.S. Department of Agriculture does not distribute drawings, but will direct you to a State that does distribute them.

Issued April 1959
